LinkedIn: linkedin.com/in/harisiddarth-s-2b8827291 | GitHub: github.com/sid-2k6

## OBJECTIVE

To leverage strong programming and analytical skills to contribute to innovative projects, develop efficient and scalable solutions, and support organizational growth while continuously learning, adapting to new technologies, and maintaining high standards of quality and performance.

## AREA OF INTEREST

- Artificial Intelligence & Machine Learning
- Full-Stack Software Development, Data Structures & Computer Networks
- Deep Learning, Computer Vision & LLMs

## EDUCATION

### Bachelor of Engineering in Artificial Intelligence and Machine Learning

Dr. Mahalingam College of Engineering and Technology, Anna University, Pollachi | CGPA: 7.8 2023 - 2027

HSC | ELGI Matriculation Higher Secondary School, Coimbatore | 85.16% 2022 - 2023

SSLC | ELGI Matriculation Higher Secondary School, Coimbatore 2020 - 2021

## SKILLS

### Technical Skills

- Programming Languages: Python, Java, C
- Tools & Technologies: Git, Docker, Ollama
- Database Management: MySQL, MongoDB
- Frameworks: Flask, FastAPI, TensorFlow, PyTorch, LangChain

### Soft Skills

- Problem-Solving, Critical Thinking, Strong Adaptability, Active Listener, Ownership & Accountability

## PROJECTS

### American Sign Language Detection Using Deep Learning

Jan 2025 - Feb 2025

- Developed a deep learning-based real-time ASL recognition system using YOLOv8 and OpenCV, integrating character detection, sentence formation, and text-to-speech conversion into a user-friendly communication tool.
- Designed and deployed a Flask web application with advanced image preprocessing, data augmentation, and model fine-tuning to achieve high accuracy and real-time performance.

### InterviewForge: Hybrid RAG for Technical Interview Mastery

Feb 2026 - Mar 2026

- Developed a hybrid RAG system combining BM25, dense embeddings, and reranking to generate grounded, citation-backed interview answers across ML, System Design, OS, and Behavioral domains.
- Built a 1000+ chunk structured knowledge base, implemented hallucination control, and optimized retrieval (Recall@5 >= 0.75) with sub-5s latency using a quantized 7B LLM and FastAPI.

## INTERSHIPS

### Zequin Technology - ML Engineer Intern

Sept 2025 - Feb 2026

- Developed and optimized machine learning models for real-time applications, focusing on computer vision and natural language processing tasks.
- Gained practical exposure to model training, evaluation, and deployment, enhancing hands-on skills in computer vision and NLP applications.

## CERTIFICATIONS

- Certified Linguaskill English (B2 Level) - Cambridge.
- Introduction to Programming in C (Elite) - IIT Kanpur.

## EXTRACURRICULAR ACTIVITIES

- Organized many plantation events around the college as the Secretary of the Environment Club.
